

## Study programme

### Part A) of the study programme \*

### Learning outcomes

<b>Faculty offering the field of study:</b>	<b>Faculty of Economic Sciences and Management</b>
<b>Field of study:</b>	<b>Economics</b>
<b>Level of study:</b>	<b>First-cycle studies</b>
<b>Level of the Polish Qualification Framework:</b>	<b>Level 6</b>
<b>Profile:</b>	<b>General academic</b>
<b>Professional degree awarded to the graduate:</b>	<b>Licencjat</b>
<b>Allocation of the field of study within academic or artistic discipline(s), to which learning outcomes for a given field of study refer::</b>	<b>Disciplines:</b> <b>Economics and Finance (90%)</b> <b>Management and Quality Sciences (10%)</b>  <b>Major discipline: Economics and Finance</b>
<b>Symbol</b>	<b>Upon completion the graduate achieves the learning outcomes specified below:</b>
<b>KNOWLEDGE</b>	
K_W01	The graduate has general knowledge of economics and its place in the system of social sciences.
K_W02	The graduate has knowledge of socio-economic structures and of institutions operating within these structures at local, regional, national and international levels.
K_W03	The graduate has knowledge of correlations between different elements of socio-economic structures as well as of the objectives of their operation and regularities that affect these correlations and objectives.
K_W04	The graduate has knowledge of types of economic and social relations in various socio-economic structures.
K_W05	The graduate has knowledge of microeconomics and macroeconomics.
K_W06	The graduate is familiar with methods and tools, including data acquisition techniques, relevant to economics, allowing to describe socio-economic structures and institutions, processes occurring in them, and interactions between them.
K_W07	The graduate has knowledge of legal, organisational, moral and ethical standards and rules contributing to the establishment of economic and social structures and institutions. The graduate has knowledge of changes taking place in them as well as of consequences of these changes.
K_W08	The graduate has knowledge of the processes of change of socio-economic structures and institutions, their underlying causes, economic determinants and consequences.
K_W09	The graduate has knowledge of theories describing socio-economic structures, and the development of these theories.
K_W10	The graduate knows and understands concepts and rules of industrial property and copyright protection.
K_W11	The graduate has the knowledge of general principles of establishing and developing business activity capitalising on the knowledge of economics.

### SKILLS

K_U01	The graduate is able to critically analyse complex economic and social phenomena, and interactions between them.
K_U02	The graduate is able to apply the knowledge in practice to solve complex micro- and macroeconomic problems.
K_U03	The graduate knows how to interpret economic data and use various sources of economic data.
K_U04	The graduate is able to anticipate economic processes and phenomena applying methods and tools relevant to economics.
K_U05	The graduate is able to apply normative systems (legal, economic, social) in economic decision-making.
K_U06	The graduate is able to use problem-relevant research methods and techniques (mathematical and statistical).
K_U07	The graduate is able to identify consequences of specific solutions of socio-economic problems.
K_U08	The graduate is able to understand and analyse the cause and course of socio-economic phenomena.
K_U09	The graduate is able to use economic terminology and to produce typical written assignments and oral presentations, at the advanced level, using advanced theoretical approaches.
K_U10	The graduate is able to use a foreign language for special purposes at the level relevant to economics.
K_U11	The graduate is able to use a foreign language within the field of economics at the B2 level.
K_U12	The graduate is able to effectively communicate to other persons their knowledge of the developments of economics in an understandable manner; to adjust the level and form of the presentation to the needs and potentials of the receivers. The graduate understands the need to present the developments of economics to non-experts in a clear and understandable manner
K_U13	The graduate aspires to development and focused on acquiring new knowledge, skills and experiences; the graduates recognises the need to improve constantly, master professional skills and competences. The graduate is aware of the limitations of their knowledge and understands the need for further education.
K_U14	The graduate is able to work in a team, to establish and maintain long-term and effective cooperation with other persons. The graduate pursues the team goals by proper planning and organisation of their work as well as the work of other persons, and to motivate co-workers to increase their efforts in order to achieve the assumed objectives.

### SOCIAL COMPETENCES

K_K01	Analytical thinking: The graduate is able to work on their own and effectively with large amounts of data, to perceive interrelations and draw correct conclusions using the principles of logic. The graduate is able to formulate questions accurately to deepen their understanding of a given topic or find the missing elements in their reasoning.
K_K02	Conscientiousness and accuracy: The graduate strives to complete a task as effectively as possible. The graduate is sensitive to details and is systematic. Professionalism and ethics: The graduate observes rules of conduct related to the profession of an economist, including ethical standards. The graduate understands the social role of the profession of an economist, and appreciates and recognises the importance of intellectual honesty and integrity in their own actions and the actions of other persons.
K_K03	Perseverance and consistency: The graduate works systematically and has a positive attitude to obstacles standing in the way of reaching the desired objective. The graduate observes deadlines and understands the necessity for systematic work on all long-term projects.
K_K04	Autonomy: The graduate realises agreed goals entirely on their own, taking autonomous and sometimes difficult decisions. The graduate is able to find information in the field literature on their own.
K_K05	Creativity: The graduate thinks creatively in order to improve existing solutions or develop new ones.
